

```
●test("uncle phil", async () => {  
    const response = await BelAir.request("philip");  
  
    expect(response).toHaveFullName("Uncle Phil");  
    expect(response).toBeParent();  
});
```

Essential

```
●test("uncle phil", async () => {  
  const response = await BelAir.request("geoffrey");  
  
  expect(response).toHaveFullName("Uncle Phil"); // Name should be Uncle Phil, not Geoffrey Butler  
  expect(response).toBeParent(); // Should be a parent, not a butler  
});
```
