```javascript
expect.extend({
    fullName(actual, fullName) {
        const { first, last } = actual;
        const actualName = `${first} ${last}`;

        const [expectedFirst, expectedLast] = fullName.split(" ");
        const expectedName = `${expectedFirst} ${expectedLast}`;

    }
});
```

```
expect.extend({
    fullName(actual, fullName) {
        const { first, last } = actual;
        const actualName = `${first} ${last}`;

        const [expectedFirst, expectedLast] = fullName.split(" ");
        const expectedName = `${expectedFirst} ${expectedLast}`;

        const pass = actualName === expectedName;

    }
});
```
