```javascript
test("carlton banks", async () => {
    const response = await BelAir.request("carlton");

    expect(response.data.user).toEqual({
        id: "carlton",
        role: "student",

    });
});
```

```
test("carlton banks", async () => {
    const response = await BelAir.request("carlton");

    expect(response.data.user).toEqual({
        id: "carlton",
        role: "student",
        name: expect.fullName("Carlton Banks"),

    });
});
```
