```javascript
test("uncle phil", async () => {
    const response = await BelAir.request("philip");

    expect(response).toHaveFullName("Uncle Phil");

});
```

```javascript
test("uncle phil", async () => {
    const response = await BelAir.request("philip");

    expect(response).toHaveFullName("Uncle Phil");
    expect(response).toBeParent();
});
```
